

User Story Title: User Onboarding Help			
#	User Story Part I		User Story Part II Acceptance Criteria
Role	As a new user		Walkthrough activates only on first launch Each major feature is explained in a step-by-step guide User can skip or repeat the walkthrough anytime from settings
Need	I want the app to have a simple walkthrough when I open it for the first time, so that I can understand how to use all the features without needing help		
Value	Makes the app more welcoming and reduces confusion for new users		

User Story Title: Real-Time Delay Reports			
#	User Story Part I		User Story Part II Acceptance Criteria
Role	As a Department of Transportation employee		Dashboard view of all delay reports by time and location Alerts are sorted by severity and time reported User-submitted issues are included in the report log
Need	I need to be able to see reports of delays or issues from the system, so that we can respond quickly and keep commuters informed		
Value	Improves response time and commuter satisfaction		

User Story Title: Smart Route Suggestions			
#	User Story Part I		User Story Part II Acceptance Criteria
Role	As a commuter		Route options are based on real-time traffic and weather data User is presented with at least one optimal route Updates appear instantly when conditions change
Need	I need to see the best travel route based on traffic and weather, so that I can get to my destination faster and avoid problems on the way.		
Value	This helps me save time and avoid delays.		

User Story Title: Weather Forecast Access			
#	User Story Part I		User Story Part II Acceptance Criteria
Role	As a commuter		Weather is shown based on current location Forecast updates dynamically throughout the day Severe weather alerts appear as notifications
Need	I need to check real-time weather updates in the app, so that I can dress appropriately and prepare for bad conditions.		
Value	Helps me be prepared and stay safe during travel.		

User Story Title: Easy Schedule Updates			
#	User Story Part I		User Story Part II Acceptance Criteria
Role	As a Department of Transportation employee		Employee can log in and update schedules without technical help Updates appear to users within one minute System verifies accuracy before posting
Need	I need to post light-rail schedule updates easily, so that riders always get the latest train info in the app.		
Value	Keeps riders informed and builds trust in the system.		

User Story Title: Real-Time Delay Reports			
#	User Story Part I		User Story Part II Acceptance Criteria
Role	As a Department of Transportation employee		Dashboard view of all delay reports by time and location Alerts are sorted by severity and time reported User-submitted issues are included in the report log
Need	I need to be able to see reports of delays or issues from the system, so that we can respond quickly and keep commuters informed.		
Value	Improves response time and commuter satisfaction.
