

Solution: Product Owner Status Reporting Solution

Review this potential for the **Entire Product Backlog Reporting** status report. Use this solution to compare with your analysis and validate your report.

Entire Product Backlog Reporting Solution:

Category	Overview
Overall Product Health	● Yellow - Progress is steady but slowed by integration delays and AI testing challenges.
Backlog Overview	120 total stories: 70 completed (58%), 25 in progress, 25 remaining. Ensure regular grooming to adjust priorities.
Key Features/Epics	Patient Portal (80% complete, on track); AI Monitoring (40%, delayed due to testing issues). Address accuracy concerns. Telehealth integration (80%, on track.) Billing and Insurance Module and Data Security and Compliance are on track for Phase 2.
Dependencies	Provider Dashboard depends on Patient Portal completion. Align team timelines to avoid cascading delays.
Budget	● Yellow - \$5M allocated, \$3.9M spent (78%). Monitor spending to avoid budget overruns.
Major Risks	■ Red - 1. Integration delays with Telehealth APIs. 2. AI accuracy concerns flagged in testing.
Stakeholder Feedback	● Green - Positive feedback on Patient Portal pilot; requests for in-app messaging feature.
Next Steps	Resolve integration and AI blockers; finalize Patient Portal; prioritize features for Q3 release.
